

SGMS System

Sure **G**rip **M**ounting **S**ystem

What is SGMS???

- SGMS is a new radial seal installation technology that allows for easier installation, increased production output, and increased reliability of jet bodies, suctions, valve bodies, etc.
- Installation is as simple as drilling the hole, installing the grommet with lubrication and pressing in the body.

SGMS Benefits

- **Eliminates**
 - Spot Facing
 - Silicone/cure time
 - Nuts
 - Comp Rings
 - Torque Wrenches

SGMS Benefits

- Varying Spa Shell Thicknesses Acceptable
- More Production Output
- Reduced Product Components Required
- Eliminates Leaks due to missed Torqueing and/or Tightening

SGMS Compatible Products

- Jets
- Topside Valves
- Water Features

When will SGMS be available?

- Changeover to SGMS is currently underway.
- Complete changeover to SGMS will be completed by 2021.
